The instructors

The workshops and seminars are conducted by DEUTA staff members who have many years product experience in the field. This knowledge is supplemented by our colleagues from Project and Innovation Management and from Development. Depending on subject matter, we also engage external instructors because of their expert knowledge of areas such as 'Product Qualification'.

Just as you wish - Wherever, whenever and however

Our customers take centre stage in all our activities. The main focus for the training sessions is provided by DEUTA-WERKE products. Cross-product themes are also explored.

You decide where training takes place!

The DEUTA Academy is located in Bergisch Gladbach but we are happy to provide our training in your premises, too. Regardless of whether the training is intended for you personally, your employees or your end customer.

We travel all around the world for you!

If your employees are available at particular times only, or wish to be trained in a particular location we will come to you.

Informationen

Customised courses

We also offer customised seminars and are happy to submit an offer regarding this.

Payment

The price of the seminar is due on receipt of the invoice.

Cancellation

In the case of cancellation up to 10 working days before the seminar is due to begin, we will charge EUR 120. After this time, the full seminar fee is due. If a seminar needs to be cancelled by us for unforeseen reasons, including at short notice, we will inform the participants immediately. Fees which have been paid will be refunded in such a case.

Workshops & Seminars

DEUTA Academy

Our Expertise

Since 1905 the name DEUTA-WERKE GmbH has been representing expertise in the areas of sensor technology, travel data recording and visualisation. We are delighted to pass this knowledge on to our customers.

Technological developments are advancing at an ever faster pace today which has lead us to offer training for the employees of our rail customers with **practical, hands-on seminars for operators**. The demands made on users are constantly increasing. New forms of organisation within companies require employees to be qualified, flexible and able to deal with challenges quickly. State-of-the-art knowledge is the precondition for certification and new specifications in safety technology.

The DEUTA Academy training programme is geared closely towards the market requirements of our customers.

Qualification measures, customer training and hands-on workshops form an integrated, high-quality training concept.

Our participants enjoy the benefits of our competence and knowledge networks.

Overview of seminars

The following is a small selection of our seminars and workshop topics. The programme is constantly being expanded. Deadlines and new themes can be found in our website: www.deuta.de

Workshop "Evaluation of PZB Travel data"

Expert knowledge from the field of data evaluation, numerous practical examples and up-to-date information on hardware and software for users.

Seminar "Expert qualification for multifunctional terminals"

Intensive instruction in the workings of multifunctional terminals. Project-specific topics covered include diagnostic possibilities, maintenance measures, application updates for employees from the maintenance area and commissioning specialists.

Seminar "Expert qualification for travel data recorders"

Comprehensive instruction in the workings of project-specific data recorders, adaptation of vehicle parameters, readout of travel data, diagnosis and project-specific adaptations etc. For employees from the maintenance area and for commissioning specialists.

Seminar "Travel Data Analysis with ADS4"

This workshop deals specifically with the evaluation of driving data in the railway sector. Participants will acquire basic skills in travel data analysis with the help of ADS4 software. The workshop will begin with the reading out of travel data followed by a step-by-step explanation of how travel data analysis is carried out. Using examples, it will be shown how search functions are used and how reports are printed. In this way, the complete functionality of ADS4 software will be passed on to participants.
