The instructors

The workshops and seminars are conducted by DEUTA staff members who have many years product experience in the field. This knowledge is supplemented by our colleagues from Project and Innovation Management and from Development. Depending on subject matter, we also engage external instructors because of their expert knowledge of areas such as 'Product Qualification'.

Just as you wish - Wherever, whenever and however

Our customers take centre stage in all our activities. The main focus for the training sessions is provided by DEUTA-WERKE products. Cross-product themes are also explored.

You decide where training takes place!

The DEUTA Academy is located in Bergisch Gladbach but we are happy to provide our training in your premises, too. Regardless of whether the training is intended for you personally, your employees or your end customer.

We travel all around the world for you!

If your employees are available at particular times only, or wish to be trained in a particular location we will come to you.

Informationen

Customised courses

We also offer customised seminars and are happy to submit an offer regarding this.

Payment

The price of the seminar is due on receipt of the invoice. An invoice and further information on the seminar will be sent 8 to 10 working days before commencement of the seminar.

Cancellation

In the case of cancellation up to 10 working days before the seminar is due to begin, we will charge EUR 120. After this time, the full seminar fee is due. If a seminar needs to be cancelled by us for unforeseen reasons, including at short notice, we will inform the participants immediately. Fees which have been paid will be refunded in such a case.

Workshops & Seminars

DEUTA Academy

Our Expertise

For over 100 years the name DEUTA-WERKE GmbH has stood for expertise in the areas of sensor technology, travel data recording and visualisation. We are delighted to pass this knowledge on to our customers.

Technological developments are advancing at an ever faster pace today which has led us to offer training for the employees of our rail customers with **practical, hands-on seminars for operators**. The demands made on users are constantly increasing. New forms of organisation within companies require employees to be qualified, flexible and able to deal with challenges quickly. State-of-the-art knowledge is the precondition for certification and new specifications in safety technology.

The DEUTA Academy training programme is geared closely towards the market requirements of our customers. **Qualification measures, customer training and hands-on workshops** form an integrated, high-quality training concept.

Our participants enjoy the benefits of our competence and knowledge networks.

Overview of seminars

The following is a small selection of our seminars and workshop topics. The programme is constantly being expanded. Deadlines and new themes can be found in our website: www.deuta.de

Workshop "Evaluation of PZB Travel data"

Expert knowledge from the field of data evaluation, numerous practical examples and up-to-date information on hardware and software for users.

Seminar "Expert qualification for multifunctional terminals"

Intensive instruction in the workings of multifunctional terminals. Topics covered include diagnostic possibilities, maintenance measures, application updates for employees from the maintenance area and commissioning specialists.

Seminar "Expert qualification for travel data recorders"

Comprehensive instruction in the workings of data recorders, adaptation of vehicle parameters, readout of travel data, diagnosis and project-specific adaptations etc. For employees from the maintenance area and for commissioning specialists.

Seminar "Basic principles of speed sensor technology"

The right sensor and the right sensor principle for individual measurements. Fundamentals of functional principles, practical examples from actual use and field reports for project engineers, design engineers and commissioning specialists.

Seminar "Introduction to evaluation software ADS 4"

Detailed introduction to the workings and expanded possibilities of the new DEUTA Evaluation Software ADS 4. For all those who have implemented the changeover from ADS 3 to ADS 4 or are planning to do this.

Workshop "SIL requirements in rail"

What does SIL mean for a project? What are the approaches to solving the problem? How can the path from requirement to licensing be most efficiently chosen together? For all those who need solutions for safe speed capture and display.

Workshop "Data recorders with safety functions"

Which functions, in particular which safety functions (e.g. dead man's switch, roll back protection) can be additionally realised with data recorders? For project engineers and design engineers.
